

## APPENDIX A: INSTALLING THE OPTIONAL RAIN HOODS

The optional UPJunior rain hoods provide all-weather protection for its user panel and connectors in fixed, outdoor installations. The rain hood is available in both vertical (PN 40.173.020.01) and horizontal (PN 40.173.021.01) models.

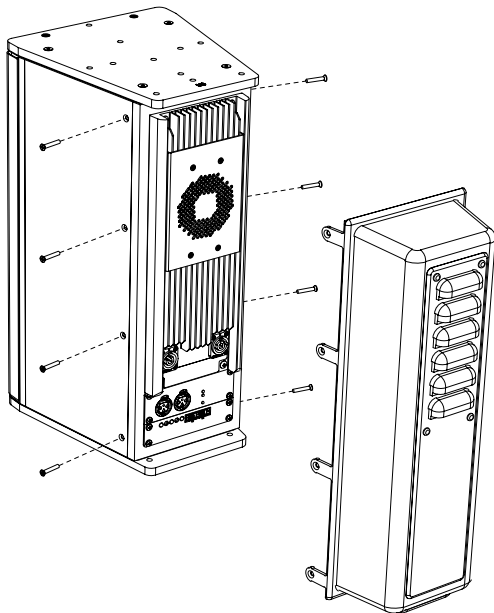

**NOTE:** When using the rain hoods with loudspeaker arrays with the MAAM-UPJunior array adapter, the maximum splay angle between loudspeakers is 40°.

### INSTALLING THE VERTICAL RAIN HOOD

To install the UPJunior vertical rain hood:

1. Attach any required cables to the UPJunior and then orient the loudspeaker vertically.
2. Remove the eight screws from the back sides of the UPJunior.

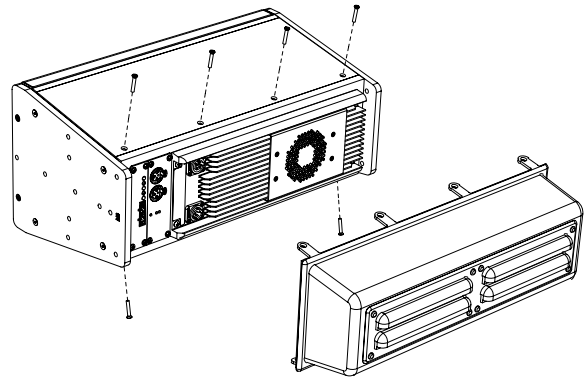

3. Carefully fit the rain hood over the UPJunior rear panel so the screw holes are aligned.
4. Insert the previously removed eight screws and tighten them.

### INSTALLING THE HORIZONTAL RAIN HOOD

To install the UPJunior horizontal rain hood:

1. Attach any required cables to the UPJunior and then orient the loudspeaker horizontally.
2. Remove the six screws from the back sides of the UPJunior.

3. Carefully fit the rain hood over the UPJunior rear panel so the screw holes are aligned.
4. Insert the previously removed six screws and tighten them.
